Hi, [REDACTED]
Some new info here:

- The safety of our customers and communities is PG&E primary responsibility.
- PG&E continues to monitor the Dixie Fire in Butte and Plumas counties, and we have crews on-site to support first-responders.
- Late this morning several transmission lines lost power from the Dixie Fire's smoke. Approximately 10,000 PGE customers in Plumas County lost power. We restored power to all customers by 2 p.m.
- The fire is near the footprint of the Camp Fire.

We are down to about 1,600 without power in Plumas County. Does this not work: www.pge.com/outage ?
There's a map you can view on it.

[REDACTED]
Yes. More than 10,000 customers. More to follow:

The safety of our customers and communities is PG&E primary responsibility. PG&E continues to monitor the Dixie Fire, and we have crews on-site to support first-responders. Firefighters requested a distribution line be de-energized last night for firefighter safety. Several transmission lines are now de-energized. As of 11:30 a.m., approximately 10,000 PGE customers in Plumas County are without power. We are investigating restoration options. It's near the footprint of the Camp Fire.

Hey [REDACTED],
I hear that due to the Dixie Power some PG&E customers are without power? Is that true? If so how many customers are impacted?

Thank you,
