Subject: RE: [PGE] no recent fire detections in fire detection page

https://w91290gm8l.cloud.pge.com/Dev/weather/v1/GOES16_detections.json is being updated now and everything seems to be working fine on our end. Please let me know if you are still seeing issues on your end.

Thanks [REDACTED] This may be a data transfer issue on our side. Can you confirm?

Weather admins, can you investigate the fire detection API?

Hi Lovelytics and PG&E team,

I am tracking a recent incident (dixie fire) and do not see recent detects in the public page:

https://pgefdp.lovelytics.info/pge_fire_app/#. Last I see are from 12:26 pm. Our internal page has the most recent detections.

Please check this out. I'm not sure if this is a data transfer issue from PG&E to lovelytics or a ingest/plotting issue.

Thanks
