Hi, [REDACTED]
Sorry. For any questions about the fire and a cause, you'll need to contact Cal Fire.
Best,
[REDACTED]

Thanks [REDACTED] That didn't answer my primary question however:

Are there any indications that the Dixie Fire was started due to a PG&E malfunction? Firefighters reported that the fire started beneath powerlines last night. I don't see an electrical malfunction fire notice lodged with CPUC, but didn't know if one was forthcoming?

Thanks
[REDACTED]

Subject: [EXT] Dixie Fire and PG&E

Hi, [REDACTED]
Apologies if I did not email you early. We are getting a steady stream of media calls.

Regarding the Dixie Fire:

- The safety of our customers and communities is PG&E primary responsibility.
- PG&E continues to monitor the Dixie Fire in Butte and Plumas counties, and we have crews on-site to support first-responders.
- Late this morning several transmission lines lost power from the Dixie Fire's smoke. Approximately 10,000 PGE customers in Plumas County lost power. We restored power to all customers by 2 p.m.
- The fire is near the footprint of the Camp Fire.

Best,
[REDACTED]
