Job offers are being made right now and will extend into tomorrow morning. [REDACTED] will reach out to me if anyone declines. Also, the scores ("list") is good for 90 days post interview, but we would also need to invite new interested candidates to another testing cycle, using the same questions. FYI

4:46 PM

Ok. MTech reached out to [REDACTED] and they are setting up another meeting.

Here we go, called in by PGE: CAD Page VEGETATION (FIRE); 500 CAMP CREEK RD / DIXIE RD ,JARBO_GAP ; ; ; Inc# 009205; Date-Time: 13-Jul-2021/17:12:54; AA500[072D 20] ATCIC1[072D 20] ATCIC2[072D 20] COP512[239D 23] AGC36 B2113 BUT-DOZ1 CO37 CO67 E2180 E2183 E2185 E2186 E376P E382 MAG4 MAG5 P2122 PIOADVSE PRVADVSE STAT36 T2108 TD2546 WT37 WT67; 40X40 SPOT ACCROSS THE RIVER NEAR THE POWER LINES Cmd: BTU LOCAL; Tac: TAC 11; Air-Air: AIR TAC 5; Air-Grnd: AIR TO GRD CDF 1; Vic: VICTOR 124.775; Map X: -121 25.0850 Y: 39 49.7077;

5:24 PM

This is near where the Camp fire started - cameras aren't showing anything yet and wind is minimal but slope there is steep with light flashy fuels

5:57 PM

2 acres remote, E213 responding with [REDACTED] - sounds like tankers will get it boxed in

6:07 PM

Just FYI - this is a HIGH LEVEL fire for PGE - [REDACTED] called me as MQ wanted info. I provided them detailed info. Apparently the PSS and HAWC are not communicating

7:07 PM

All done?

7:10 PM

I guess my text message didn't get out to you and [REDACTED] Tankers have it boxed in at 2 acres. Right next to our Tline. CALFIRE engines too large to make access so CALFIRE has tasked E213 to make access for perimeter control. They have type 6's enroute from the Valley

7:25 PM

Nice

7:26 PM

Hopefully we'll get a break on suppression costs!

[REDACTED] [REDACTED] 7:29 PM

[REDACTED] [REDACTED] 7:30 PM

That Tline is supposed to be "in clearance mode" according to our Tline Sup

[REDACTED] [REDACTED] 8:16 PM

CALFIRE found access so they have released E213.
