Latest Fire update Dixie Fire now 100 acres burning with a moderate ROS up slope and down canyon under nightly wind. IC states Fire burning down Camp Creek Rd toward T lines. [REDACTED] advised. [REDACTED] and [REDACTED] in route to ICP
- [REDACTED] _\$!<Other>!\$_ [REDACTED] 9:34 AM
Fire update Dixie Fire update. Fire is 900 acres burning still under down canyon winds in the bottom of canyon along Camp Creek Rd and up slope toward the Caribou Table 230kV at the ridge top U line/ Concow Rd. Fire is beginning to heat up with increased activity. Very steep and inaccessible terrain. Expect Fire to continue up slope and transition from down canyon in the drainage to up canyon soon with daily wind transition. I've been in contact with [REDACTED] SIPT [REDACTED] and E211 & E213 pre treating Bucks Creek 1101 section along Hwy 70 from Rock Creek east and then they will pre treat Big Bend 1101 later today/tomorrow from Flea Mtn. back west to Concow. PSS [REDACTED] at scene as AREP, PSS [REDACTED] support. If you cannot reach me try SIPT [REDACTED] as he is my back up at the fire due to poor communications. PSS [REDACTED] has GIS working on asset map with fire perimeter.
- [REDACTED] 10:29 AM
Thank u!
- [REDACTED] 10:50 AM
Are u in contact with SIPT? We'd like to have them pre-treat Cresta Dam Bridge.
- [REDACTED] _\$!<Other>!\$_ [REDACTED] 10:52 AM
I'm in the canyon now. I'll see if I can get them on the radio Unsent
- [REDACTED] _\$!<Other>!\$_ [REDACTED] 11:22 AM
SIPT response We are working the rock creek area (poles) but will access the Cresta facilities. We cannot use retardant over the River though
- [REDACTED] 11:51 AM
Thanks [REDACTED]
- [REDACTED] _\$!<Other>!\$_ [REDACTED] 6:31 PM
From [REDACTED] [REDACTED] please pass on to [REDACTED] that we have a PGE SIPT engine posted at the Cresta Dam bridge and they will keep it from igniting. They will be there all night. They have hose on it and are prepared for ember cast. The fire is currently about 100 yards above the tracks across the bridge.
