From [REDACTED] I found a Plumas News article that says we de-energized the trans lines at firefighters request. I emailed the editor asking that it be corrected. Will email you with the corrected version. [REDACTED]

2:07 PM

Also, Plumas has now been fully islanded

2:07 PM

No customers remain out in that area

2:08 PM

Copy that.

2:08 PM

A Firm.

2:08 PM

Copy, working my way up to the ICP at Flea Mtn.

2:11 PM

Hey [REDACTED], how's the SIPT work coming along? What are your priorities for pre treating? Thanks!

2:12 PM

He's probably in the canyon [REDACTED], but priorities are the Bucks Creek from Rock Creek east along Hwy 70. About 30 poles and then move around to the Big Bend at Flea Mtn

[REDACTED] 2:55 PM  
The official acreage is 1,100. The perimeter in the image is 600+ acres

[REDACTED] 2:57 PM  
If you can draw on that map by hand in an hour from now, I'll make a .kmz and forward that to GIS

[REDACTED] 3:00 PM  
Copy, they are setting up POD runner with LTE so I should be able to draw it on Maps+ image and email or text you. Give me that hour

Here is an image sketch of the fire. It looks different then the MODIS but talking with [REDACTED] [REDACTED] he thinks is fairly accurate if you want to have GIS work from that image to digitize perimeter.  
*Attachment: IMG\_0033.heic (214 KB)*

[REDACTED] 4:00 PM  
Ok. In making a .kmz of this, it roughly sketches out 700 acres. Has it turned northeast a little more than the sketch shows? Hard to tell I know...?

[REDACTED] 4:05 PM  
Well my sketch is different that the MODIS perimeter, but that was based on [REDACTED] stating that he thought the fire was more to the north in Swamp Creek at the head rather than to the west. So yeah, it's a SWAG.

Can you send me your MODIS link? I can't find my bookmark

[REDACTED] 4:17 PM  
Disregard...found it

Gentlemen, I need an incident update for an 1800 HAWC report. Thanks!

[REDACTED] 5:31 PM  
[REDACTED] They are still calling 1100 acres, 0% contained as they have not had the opportunity to map it. They have a NIROPS flight scheduled for tonight that should provide better data. Here is there box about QR code for that and other products.
