Having some tech issues will let you all know when I'm up

[REDACTED]

9:54 AM

Morning from San Ramon

[REDACTED]

10:00 AM

ok up and going

[REDACTED]

10:02 AM

nothing in AOR 3 Chapman, Brandon

10:03 AM

AOR-02: Dixie Fire just updated @ 1200 Ac and ePage noted as well. Not much else going on in 2.

AOR-04: Watching the Bald Incident skunk around. No immediate threats at this time and Sups are aware. Location: 38.1430, -120.1030 Camera: Strawberry #1. River incident also updated and no other incidents pending at this time.

1 • Chelsy Seymour • Michael Donovan

10:04 AM

Morning

10:07 AM

Also disregard the Alchera Notifications for Strawberry. It is the Bald Fire and we are all over it!

10:25 AM

Pix from my Cousin's Place up in Oregon overnight. It sounds like they are advising the locals the 500kV's aren't out of the woods just yet and the Log Fire to the Northeast is on a rampage now as well at 200 Ac with a mod-rapid ROS. Locals are advising there is a strong potential that Log Fire will partner up with the Bootleg depending on today's conditions! He lives off of HWY 140 northeast of Beatty Or.

10:26 AM

wow hope he is safe

10:28 AM

As a person, not so much! LOL, He and his Gal are in a safe spot now and the fire did leave his place standing this morning thank goodness!

#ButteCo #DixieFire AA is requesting PG&E to De-energized the 240 KV lines, both at the head and the heel of the fire. PG&E says this will impact over 50k customers in the Sac. Valley.

For anyone looking for additional awareness on new starts, This layer came out from NOAA back on 05/25 and gets updated daily. It is a blended product composed of fire detection data from GOES/ABI, the JPSS/VIIRS and EOS/MODIS sensors that came out of one of my classes at NASA. Below is the URL or feel free to read up on it by searching for NOAA HMS FIRE DETECTION in the add data portion of the WIV. So far it has been very responsive and pretty spot on!

4:07 PM

Alright, CHP is down for me.

4:08 PM

Mine is back up and running normally.

4:08 PM

yup

4:08 PM

back down

4:08 PM

mine is down

4:08 PM

back down

4:09 PM

There it goes... It's back down for the count now!

4:10 PM

sweet maybe it is the SRVCC curse. lol

4:12 PM

Probably! More than a few gremlins still lurking here

4:20 PM

CHP back up!
