When can we have geofence need and associated note in livesafe made and used for our coworkers? ETA?

3:21 PM

Geofence may be owned by Corporate Security, however I am working on that as we speak. Looking to have completed by COB today.

3:22 PM

GIS stated earlier today that they do not provide a zip code analysis when there is just an evacuation warning. If EVBG is required, GIS will have to provide the HR Branch Director with impacted area zip codes to conduct impacted personnel analysis to shape targeted emergency messaging.

3:22 PM

Maybe we just use the evacuation area?
