Teams chat between [REDACTED]

7/14/2021, 3:29 PM

[REDACTED] - the EOC is activating for the Dixie incident - can we get a Tech Spec assigned for this incident - basic plan would be for coordination with GIS for mapping requests as well as evac reporting - These are my initial thoughts - more to follow...

3:31 PM

Tech specialist generally do Evacuation reports. I am not trained to do them. Nor is [REDACTED] Are you thinking night shift? Is there a GIS specialist working the EOC?

3:32 PM

Don't do evacuation reports.

3:46 PM

Not sure yet - that's what I'm trying to determine - [REDACTED] have done evac reports for us - I think we can handle it at this point

3:47 PM

I thought [REDACTED] was supposed to be trained for Evac. reports too?

3:47 PM

Good call! I will talk to [REDACTED] tomorrow about that

3:51 PM

Also, If there is a GIS specialist assigned to the EOC, then the mapping should be easy. The gap is when someone wants to get access to the AID. Adding a new user requires an MEA request and their supervisor's approval--so it can be immediate.
