**Subject:** demo Friday

We have a very important demo this Friday between 9am to 1pm. I would like to demo entire end to end process from collecting sample to running it on devices and showing results on .me iPhone and Android. Please have 2 phones ready for demo also. I assume production servers will be easy to use eventhough the results can be marked as demo.

You can run chem14 and lipids and have PSA and total testosterone ready just in case we add more or run those instead of chem14&lipid on some of the participants. We will have 5 people here.

Diana. We will need light breakfast, tea, coffee water etc. I have already booked tricorder for this.

Thanks.
