Subject: RE: WAG Specimens Tonight
Received: Thur 11/14/2013 5:10:18 AM

These samples have arrived tonight.

I will bring them down to Normandy, and will also bring the vacutainers to CLIA where they'll be run.

Thanks,
Dan

Subject: WAG Specimens Tonight

All,

The first set of ***live*** specimens from PHX have been dropped at the airport and will be arriving at 1601 around 8.30pm. These include CTNs and Vacutainers. All patient & physician info exists in LIS. For patients that had CTNs collected, please enter all results in LIS and generate the report from LIS. For patients that had vacutainers collected, please process these on clunkers and report through Labdaq for the time being.

Dan/Sani – these will be delivered to the front desk as S&R will be closed. Please be prepared to pick them up.

CLIA – please look at the pending list in LIS; this will show you what tests have been ordered so you can prepare accordingly (you can sort by date to see all from 11/13/13). View each requisition to see what containers have been collected for each patient. The PSC locations in AZ are WAG 5453 and WAG 3464. There was one demo patient whose specimen already arrived (I will email you separated with this person's name) and a few test patients that are not real.

Beginning tomorrow, we will be instituting 2 courier runs per day. Nishit stated earlier that the evening delivery at 1601 would be 4-6pm, but this may in fact be later, given that some specimens must be processed within 24 hours and will be sitting overnight in the Tempe office. We will have the weekly scheduled completed tonight that will include flight numbers for specimen shipment and arrival times at 1601.

Let us know if you have any questions.

Thanks,
Max
