Okay, you read my mind. I was going to mention about how they do their inspections and how the team that comes in can be from various places—other corporate entities as well.

Sounds very good.

Mark

At some point. We are thinking about this. we have had concerns that the auditors may be from competitive labs and Peter has offered to make sure that doesn't happen and he personally could lead the inspection which will be kindda cool.

Sunny,

Are we thinking of becoming accredited by CAP, eventually?

Mark

Adam/Mark.

Elizabeth met with Charles Roussel, CEO OF CAP, here in our office today on our broader collaboration efforts with them (their broader collaboration with us) over next few years. As shared in the past, we have excellent relationship with him.

He also reconfirmed our position on AAP and PT as discussed yesterday and as we have always known. We are going to be working with CAP closely over coming months to do some beneficial things which will be good for lab businesses everywhere and certainly for us.

Just an FYI.

Thanks.

Sunny.
