If specimen handling conditions permit, we should freeze them for testing tomorrow.

Mark

Subject: Testosterone QCs Fail

Hi Mark and Adam,

I wanted to let you know that Total Testosterone is failing QCs. Yesterday each reader had two consecutive failures. There is a TST sample that was not run yesterday and another that has arrived this morning. I am running the QCs, but I'm not sure if I can run the samples if they pass today. Suraj's team is almost done calibrating a new set of cartridges that will hopefully be in use tomorrow or the following day.

What should I do with the two samples I have now?

Thanks,

Romina
