**Subject:** Consultation

Dear Ms. Abbott:

You were referred to me by Larry Kricka as a possible quality consultant in the laboratory.

Some of the contracts that we have at Theranos require routine third party consultation and reporting on laboratory quality, and we are searching for a qualified person to perform this task. The applicant should be a clinical laboratory scientist or a medical doctor board certified in clinical pathology. They should have substantial supervisory experience and/or quality management experience. Certification as a CAP inspector or team leader is desirable, as is experience as a CLIA or state laboratory inspector.

The duties include travelling to Theranos laboratories in California, Arizona and Pennsylvania to perform a comprehensive quality audit and inspection of the facilities 3 or 4 times per year. The evaluation will include safety, personnel, instruments, assays, information systems, specimen accessioning, reporting and quality systems. A comprehensive report will be issued to the Board of Directors.

Competitive compensation will be offered and reasonable expenses will be covered.

If you are interested, please send a copy of your resume or curriculum vitae, along with a cover letter to me by email.

Sincerely,

Donald Tschirhart, MD  
Laboratory Co-director  
Theranos Clinical Laboratory  
Newark, California
