With the addition of 3 Lab Associates this week and 2 more joining by Friday, the total headcount dedicated to ELISA now will be 30 (including 2 of you).

I would like to split the team in 3 members of 10 each next week or week after if you think there is enough leadership to get this done in 3 teams in parallel OR move 6-8 people back to Binders in 2 weeks.

My preference is have all 30 people on ELISA and move much much faster so we get the Thyroid panel and Fertility panels completed this month or by 11/10 at the latest per our plan.

At the very least, the new hires are coming in with expectation that they will work 55-60 hours and I want to make sure that happens. They should be here on weekends to go thru precision runs or other work required to keep the momentum going.

We can discuss this in person if you wish.
