For the area inside the Normandy Lab that is cordoned off by the dividers – if the inspector asks, we should say this area is for future growth and is being organized (as is the case) but is still restricted only to the CLIA lab & authorized team (as is the case). Or will this not be an issue as to why we have dividers in the lab.

Also, FYI. the lab is certified as BSL2 facility as you may already know.

Thanks.
