Subject: validation reports

Hi Victoria,

The validation work is complete and the report is prepared. It is currently making its rounds for review internally at Theranos. I will communicate the reports for the three PD analytes (LH, FSH & Estradiol) to the Celgene team once the review process is complete. I expect the reports to be ready for communication to the Celgene team next week.

Let me know if you have any follow up questions or concerns.

Kind regards.
