Subject: AFRICOM training

48 hours of continual testing of the reader at 110 deg F completed successfully tonight. We ran 100 protocols sequentially – so I feel very good about reliability for this deployment.

After removing the device from the thermal testing chamber, the AFRICOM protocol was tested successfully – so it is good to go for your demo tomorrow.

Reader is #106 and is sitting the in QA test area. The extra AFRICOM cartridges are sitting by Mike Chen’s desk.

Please let me know if you have any questions.
