Will do.

Physician noted that it would be surprising to see the count drop so much, even with a miscarriage. Hence the agreement to collect another sample.

Please stay on this as I would like to see what happened the first and second time and with the rerun.

What did the physician say?

Yes, run on Edisons.

We spoke with the ordering physician, and made the decision to collection another sample from the subject. We are not reporting out the very low result.

When we get the new sample, we will immediately test it in duplicate.

Actually, I just touched bases with Christian and Adam on this earlier.

I asked Adam to call the doctor to ask about the clinical situation. And then we will be able to decide if we want to release the results.

In essence, the HCG value for this patient was high on 5/21 (indicating pregnancy) and then dropped very very low on 5/23, possibly indicating a miscarriage or abortion. So we want to be careful with this one.

Subject: OORL results?

Physician is calling about results for HCG. Notes in LIS indicate HCG results are OORL, do not release until further notice.

Can someone tell me what I can tell the physician. Visit date is 5/23/14.

Thank you,

Amy
