HIV 1 RNA

Result Interpretation

Not detected: (Target not detected)
< 40 copies/mL = Detected but not quantifiable
40 <= x <= 10,000,000 copies/mL = Detected and quantifiable
> 10,000,000 copies/mL = Detected but greater than the Upper Limit of Quantitation

*Results from the assay must be interpreted within the context of relevant clinical and laboratory findings

LAB NOTES:

HIV antibodies were not confirmed and HIV-1 RNA was not detected. No laboratory evidence of HIV-1 infection. Follow-up testing for HIV-2 should be performed if clinically indicated.
