Subject: RE: Mens' health cartridge demo on 7.16 in Chicago

Sounds good to me

Getting a good result under that type of blind testing is good news.

Tony

Subject: Mens' health cartridge demo on 7.16 in Chicago

FYI.

I heard back from the executive on whom we had performed the demo on 7/16 in Chicago. He said his results from the central lab, that he did on his doctor's order, were identical to the results from our system during the demo. He had gone to see his doctor after he got our results during the demo.

I hope this gives an additional dose of confidence (not that you needed more of it) to everyone as these were difficult assays - included Vitamin D(difficult). We are doing good work here and will save millions of lives and will improve the quality of care delivered to hundreds of millions more because of our work. This knowledge and conviction should be the greatest source of our confidence. I think it is a unique opportunity when your career and work is not just work that pays your bills, but is also in service of humanity and good for the greater good. I hope you all share this sentiment.

Cheers.
