[WAG Visits_091113 to 101713.xlsx](#)

Updated with venous draw subject and 5 demo subjects not in TLIS (4 at 1601, 1 at Walgreens).

Let us know if you need anything else.

Thanks,

Max

Can you add that venous draw subject from WAG?

Also, does this include all subjects sampled here at 1601?

This list does not include the one patient for whom we did a venous draw at WAG, nor does it include any of the Safeway samples we've processed from Pleasanton. Did you want those as well or does this suffice?

The only data missing is date processed – this should be equal to the visit date for almost every patient. I believe Chinmay should have this info (for CBC at least) if we need exact dates, let me know.

Thanks,

Max

Ok, we should be able to pull all of that together. Do you need it tonight or can we get it to you sometime tomorrow morning? We think we have all of this info in the LIS but would like to confirm with the CLIA folks before providing to you.

All would be great. If you can indicate which are friends and family as well, that would be perfect.

Thanks,
Daniel

Did you want us to include all of the employee screening tests as well (CBC and HbA1c), or keep those separate?

Can you guys please send me a list of all CLIA orders fulfilled since our launch? Ideally per order, the list of tests ordered, tests reported and the date the sample was processed and then reported.

Thanks,
Daniel
