Actiq Risk Management Program (RMP)
08/01/01

1.0 Introduction

The *Actiq* Risk Management Program (RMP) has been designed to address three key potential risk situations:

1. accidental ingestion of *Actiq* by children
2. improper patient selection (prescriptions to and usage by opioid non-tolerant patients)
3. diversion or abuse

Anesta Corporation, a subsidiary of Cephalon, Inc. has designed and developed a comprehensive program with the primary goal of making every reasonable effort to reduce the risk of potential untoward events in the unintended populations to the extent possible. This program includes the following:

- strong labeling for professionals, patients and caregivers
- product specific design features to increase child safety
- redundant child-resistant packaging and storage containers
- comprehensive professional, patient caregivers, and child educational programs
- interventions at the point of dispensing
- CII status for *Actiq*

This document provides details and implementation tactics for all elements of the *Actiq* Risk Management Program. No single element can provide the complete answer to reducing risk. A lengthy series of events must occur in sequence before a risk event can occur, yet any one of multiple RMP elements can intervene to interrupt the sequence and prevent the risk event. Redundancy of program elements is one measure used to strengthen the effectiveness of the RMP.

The purpose of the RMP is to ensure the safe use of this product. It is not intended that any portion of this RMP should be used in a promotional context or used to promote *Actiq* in a manner inconsistent with the product label.

The RMP and all of its components should be fully operational at the time of launch.

1.1 Key Messages for the RMP

There are several key messages repeated throughout the RMP, which are listed below. For the balance of the document, these messages will be referenced simply as Child Safety, Proper Patient Selection and Prevention of Diversion and Abuse messages.

Actiq Risk Management Program (RMP)
08/01/01

- Child Safety Messages
 - *Actiq* must be kept out of the reach of children
 - *Actiq* could be harmful or fatal to a child if accidentally ingested
 - *Actiq* must be properly stored and handled
 - *Actiq* must be properly disposed of after use
 - Healthcare professionals must counsel patients on child safety messages
 - Accessible and easily understood directions on what to do in case of accidental ingestion
- Proper Patient Selection Messages
 - Definition of an opioid tolerant patient
 - *Actiq* is specifically contraindicated for use in opioid non-tolerant patients
 - *Actiq* is specifically contraindicated for use in acute/postoperative pain
 - Directions on what to do in case of suspected overdose
 - *Actiq* is specifically indicated solely for the treatment of breakthrough cancer pain in chronic opioid tolerant cancer patients
- Prevention of Diversion and Abuse Messages
 - *Actiq* is a CII medication
 - *Actiq* is to be used only by the patient for whom it is dispensed
 - *Actiq* may be habit forming
 - *Actiq* requires appropriate disposal of unused medication

2.0 Product Definition

The *Actiq* unit, containing dosages of fentanyl ranging from 200 to 1600 mcg per unit, consists of a berry-flavored lozenge on a handle (see Attachment 1). *Actiq* provides median peak fentanyl blood levels in 20-40 minutes (range of 20-480 minutes) when the unit is consumed over a 15-minute period and fentanyl is absorbed by a combination of transmucosal and gastrointestinal absorption.

Concern has been raised that *Actiq* may be perceived as a lollipop. Because of the design of the *Actiq* unit and its drug delivery characteristics, steps will be taken in an effort to minimize the risk of accidental poisoning, inappropriate use and diversion.

Actiq Risk Management Program (RMP)
08/01/01

2.1 *Actiq* Unit

The *Actiq* unit consists of an opaque, white to off-white solid drug matrix that appears medicinal to make it look less appealing to children. The solid drug matrix and the tag at the end of the handle indicate the dosage strength. The handle tag is intended to provide immediate documentation of drug and dose in the event of an accidental poisoning. A yellow triangle icon is also imprinted on the handle tag as a reminder of the child safety precautions.

The *Actiq* unit complies with current drug imprinting requirements (see 21 CFR §206.10, Imprinting of Solid Oral Dosage Form Products for Human Use).

2.2 *Actiq* Child-Resistant Blister Package

Each *Actiq* unit is individually sealed in its own child-resistant blister package. This blister package is made of thick PVC/Aclar blister packaging material with a strongly sealed foil/paper lidding that requires scissors to open. It meets the specifications provided in the Poison Prevention Packaging Act. The child-resistant testing was conducted in compliance with the Poison Prevention Packaging Act of 1970, 16 CFR §1700, cited in the Federal Register (Volume 38, No. 151, August 7, 1973). This package passed the child resistance test protocol with a 100% effectiveness rating, exceeding the 80% requirement.

Individual child-resistant packaging (one dosage unit in each blister package) is intended to minimize exposure by limiting access to just one unit at a time.

The blister package is opaque so that a child cannot see the unit when it is in the blister package. The blister package does not resemble food or candy wrappers.

The dosage strength of each unit is marked on the solid drug matrix, on each handle tag, on the blister package and on the shelf carton. The handle tags, blister packages and cartons have colored markings that are a secondary aid in product identification.

| | |
|----------|----------|
| Gray | 200 mcg |
| Blue | 400 mcg |
| Orange | 600 mcg |
| Purple | 800 mcg |
| Green | 1200 mcg |
| Burgundy | 1600 mcg |

The blister package utilizes an icon to draw attention to warnings about child safety and opioid tolerance and standard product identification information. (see Attachment 2). It also contains a reminder to read the *Actiq* Patient Leaflet. In addition the blister package label contains the CII symbol, a "May be habit forming" warning, and an "Rx only" warning.

Actiq Risk Management Program (RMP)
08/01/01

2.3 *Actiq* Shelf Carton

The *Actiq* shelf carton includes labeling messages targeting all three at-risk populations (Attachment 3). The shelf carton contains strong warnings prominently and redundantly displayed on the front and back pharmacy label space on the back of the shelf carton.

- The front of the shelf carton has a conspicuous icon calling attention to warnings about child safety, and a reminder to read the *Actiq* Patient Leaflet. There is also a warning about appropriate patient selection.
- The back of the shelf carton contains a checklist for the pharmacist. The checklist reminds the pharmacist to make sure the patient is already taking opioids chronically, to counsel the patient about child safety, to encourage the patient to read the *Actiq* Patient Leaflet, to discuss the *Actiq* Welcome Kit, and to counsel the patient about disposal of partially consumed units.
- On the left hand side of the back of the shelf carton an icon calls attention to prominent warnings about child safety, the need for appropriate patient selection (opioid tolerance), the importance of appropriate disposal of partially consumed units, a reminder to read the *Actiq* Patient Leaflet, and prominent instructions on what to do in case of an accidental exposure.
- On the top of the shelf carton is another reminder for the patient or caregiver to read the *Actiq* Patient Leaflet.

At the initiation of *Actiq* therapy, it is recommended that physicians prescribe an initial supply of six 200 mcg units. At each new dose of *Actiq* during titration, it is recommended that only six units of the next higher dose be prescribed to limit the potential for left over units in the home.

The most prominent front panel warnings will be provided in Spanish in sticker form to pharmacies upon request. As additional languages are identified, appropriate stickers will be developed and distributed in a similar fashion.

Each shelf carton contains ten strips of three blister packages, for a total of 30 blister packages of a single strength of *Actiq*. Each carton will also include five patient leaflets and one package insert. The shelf carton represents approximately a ten day to two-week supply of *Actiq* after the appropriate dose has been established via titration. Except for the top panel, all printed panels of the shelf carton contain the CII symbol.

2.4 Potential Partially Consumed *Actiq* Units

Actiq Risk Management Program (RMP)
08/01/01

It is important to limit the availability of unused and partially consumed units in the home. Warnings are placed on the shelf cartons to remind patients to properly dispose of partially consumed units. The following steps will be taken to reduce the availability of unused and partially consumed units by (1) the provision of multiple dosage strengths, (2) proportional pricing, and (3) directions for prescribing.

2.4.1 Multiple Dosage Strengths

Actiq is made available in six dosage strengths (200, 400, 600, 800, 1200, 1600 mcg units) so that patients can be titrated to the unit strength which provides adequate relief with acceptable side effects. The directions to both healthcare professionals and patients clearly state that *Actiq* dosage units *are to be completely consumed*.

2.4.2 Pricing

Pricing of *Actiq* will provide proportionality on a per mcg basis. This pricing plan is an attempt to minimize the economic incentive to partially consume an *Actiq* unit and save the remainder for a future breakthrough cancer pain episode, reducing the potential risk to children.

2.4.3 Prescribing Directions

As per the *Actiq* titration instructions, the initial recommended prescription size is six units of the 200 mcg dose. If a patient requires a higher dose, the titration instructions recommend a second prescription of six units of the 400 mcg dose. This process of prescribing six units of the next highest available dosage form is recommended until the appropriate dose is found.

The package insert contains specific instructions recommending that physicians prescribe a small quantity (6 units) for titration and/or dosage adjustment in an effort to minimize the number of units in the home.

3.0 Labeling

3.1 CII (Schedule II Classification)

The U.S. Drug Enforcement Administration places very specific controls on the storage, distribution, accountability, prescribing and usage of scheduled products (see 21 CFR §1301). *Actiq* will be a CII product, consistent with other strong opioids such as fentanyl, morphine, oxycodone, and hydromorphone-based products. CII is the most restrictive classification available, and raises the overall level of vigilance and surveillance by all parties involved with the product. These restrictions include:

Actiq Risk Management Program (RMP)
08/01/01

- strongest tracking and controls throughout the distribution system (DEA Form 222 required for all transactions)
- strict accountability of finished units
- most stringent physical storage requirements
- no refills allowed, triplicate prescriptions may be required in some states
- registered pharmacist is required to check for a legitimate medical purpose before dispensing

The status of *Actiq* as a CII product is the primary risk management element against the third potential risk event -- the potential for diversion and/or abuse. It is important to note, however, that simply the fact that a product is CII raises the level of attention devoted to the prescribing and dispensing of the product by all parties involved in the process and that this is expected to also reduce the risk of accidental ingestion and prescribing for opioid non-tolerant patients because of this heightened awareness.

3.2 Patient Leaflet

A Patient Leaflet has been written for *Actiq*, and five copies will be packaged in every shelf carton (see Attachment 4). Extra copies will be broadly distributed for use by physicians, nurses, pharmacists, caregivers, and patients. The leaflet will be included in the *Actiq* Welcome Kit and in other direct to patient communication and educational programs. It will be available in Spanish as well.

- The first page of the *Actiq* Patient Leaflet contains a strong boxed warning and redundant child warning with graphics for emphasis.
- The *Actiq* Patient Leaflet explicitly addresses, in plain language, preventing access by children. These messages include:
 - Child Safety messages
 - safe storage instructions for whole and partially consumed units
 - Disposal directions for used and unused units and a 1-800 number for additional disposal assistance. Patients calling the 1-800 number will receive a more personalized “walk through” of disposal instructions. If additional assistance is required, callers will be referred to their local DEA office for information.
- It contains emergency information on what should be done in case of accidental ingestion by a child or any opioid non-tolerant person.
 - a prompt to call 911 if the patient or child is not awake and alert
 - a prompt to call Poison Control at 1-800-690-3924 if the patient or child is awake

Actiq Risk Management Program (RMP)
08/01/01

- instructions for care of the patient or child who is having trouble breathing or not breathing at all
- It contains proper patient selection messages
- Strong language has been used throughout the *Actiq* Patient Leaflet. In all warning statements, the word “must” is used instead of the word “should.” The warning language “can be harmful or fatal to a child” and “can cause injury or death in people who are not already taking prescription opioid (narcotic) pain medicines...” is used.

3.3 Package Insert

The *Actiq* Package Insert (PI) clearly and explicitly communicates messages about child safety, proper patient selection, and prevention of diversion and abuse (see Attachment 5). These messages (see Attachment 6) are important elements of the RMP. The PI highlights the serious risks associated with *Actiq* use and mandates that the healthcare professional must become involved in the process of educating patients and home caregivers. The key elements in the PI include:

- Indication: *Actiq* is indicated only for the management of breakthrough cancer pain in patients with malignancies who are already receiving and who are tolerant to opioid therapy for their underlying persistent cancer pain.
- Black box warnings, which are:

PHYSICIANS AND OTHER HEALTHCARE PROVIDERS MUST BECOME FAMILIAR WITH THE IMPORTANT WARNINGS IN THIS LABEL.

***Actiq* is indicated only for the management of breakthrough cancer pain in patients with malignancies who are already receiving and who are tolerant to opioid therapy for their underlying persistent cancer pain.** Patients considered opioid tolerant are those who are taking at least 60 mg morphine/day, 50 mcg transdermal fentanyl/hour, or an equianalgesic dose of another opioid for a week or longer.

Because life-threatening hypoventilation could occur at any dose in patients not taking chronic opiates, *Actiq* is contraindicated in the management of acute or postoperative pain. This product **must not** be used in opioid non-tolerant patients.

Actiq is intended to be used only in the care of cancer patients and only by oncologists and pain specialists who are knowledgeable of and skilled in the use of Schedule II opioids to treat cancer pain.

Actiq Risk Management Program (RMP)
08/01/01

Patients and their caregivers must be instructed that *Actiq* contains a medicine in an amount which can be fatal to a child. Patients and their caregivers must be instructed to keep all units out of the reach of children and to discard opened units properly.

- Titration instructions which minimize the number of units in the home
- Detailed safe home handling and storage
- Detailed instructions for disposal of used and unused units
- CII designation

The *Actiq* insert will be included in each shelf carton.

4.0 Professional Medical Education

Cephalon, Inc. will work in conjunction with FDA (through the Office of Health Affairs) in interfacing with licensing boards and professional associations on the development of and dissemination of educational materials related to *Actiq*.

4.1 Key Message Points

The education of physicians, nurses, pharmacists, caregivers and patients on the safe use of *Actiq* is an integral part of the *Actiq* Risk Management Program. These educational messages are drawn directly from the *Actiq* Package Insert. The key safety messages, which have been described earlier in section 1.1 of this RMP, include:

- Child safety messages
- Proper patient selection messages
- Prevention of diversion and abuse messages

The educational programs for physicians, nurses, pharmacists, caregivers and patients will also reinforce the following:

- Process for titration to an effective dose
- Proper (total) consumption of the product
- Proper storage and disposal of the product
- Efficacy and side effects of the product
- Basic Life Support training and potential for certain families to be trained in the treatment of accidental narcotic overdose including antagonist therapy.

Actiq Risk Management Program (RMP)
08/01/01

These key educational messages, primarily focusing on safety, are provided to the physicians, nurses and pharmacists through the communication vehicles, which are discussed on the following pages.

4.2 Breakthrough Cancer Pain Nursing Medical Education Monograph

This monograph is written by nurses who participated in the *Actiq* clinical trials. It contains specific information about breakthrough cancer pain and the *Actiq* key safety messages. It will be distributed via direct mail and the sales force. This publication has also received Oncology Nursing Society CEU certification for 3.5 hours of continuing education. This as well as all educational and promotional launch materials will be submitted to and reviewed by FDA prior to use.

4.3 The *Actiq* Speakers Bureau / Medical Education Programs

Prior to product launch, Anesta and Abbott formally trained the following professionals on all aspects of *Actiq* consistent with the package insert, particularly the RMP elements (Attachment 6):

- At least 50 prominent physician educators in pain management
- At least 50 prominent nurse educators in pain management
- At least 25 prominent pharmacist educators in pain management

These groups will then be called upon to educate their respective peers and patients via presentations in local, state, regional, and national settings.

4.4 Publications

Manuscripts will be submitted to peer-reviewed journals for consideration. They will include messages that reinforce elements of this RMP. The manuscripts selected for publication are those that combine a specific focus into the key cancer pain management audience, as well as other healthcare groups who make up the RMP target audience.

4.4.1 Broad-Based Publications

- Journal of the National Cancer Institute (circulation 10,000+)
- Journal of Pain and Symptom Management (circulation 10,000)
- Journal of Clinical Oncology (circulation 20,000)
- Anesthesia and Analgesia (circulation 5,000)
- Seminars in Oncology (circulation 10,000)

Actiq Risk Management Program (RMP)
08/01/01

- Journal of Hospice and Palliative Care (circulation 3,000)
- Oncology Times (circulation 20,000)
- Cancer for the Clinician (circulation 10,000)

4.4.2 Pharmaceutical Compendia

Pharmaceutical compendia will serve physicians, nurses, and pharmacists in several ways. The compendia regularly send out updates to inform about new products. The circulation numbers for each of these publications, although proprietary, are believed to be greater than 50,000 per publication. Cephalon, Inc. will have *Actiq* listed in each of the following well-known compendia:

- Physician's Desk Reference (PDR)
- American Hospital Formulary Service (AHFS)
- Facts and Comparisons

In cases where material is excerpted from the Package Insert, Cephalon, Inc. will contact these publications to request increased emphasis on the RMP elements.

4.4.3 Major Nursing Journals

- American Journal of Nursing (circulation 250,000+)
- American Journal of Hospice and Palliative Care (circulation 100,000+)
- Nurse Practitioner (circulation 100,000+)
- Home Health Care Nurse (circulation 25,000+)
- Clinical Journal of Oncology Nursing (circulation 20,000+)
- Seminars in Oncology Nursing (circulation 6,000+)
- Oncology Nursing Forum (circulation 20,000+)
- RN Magazine (circulation 200,000+)

4.4.4 Cancer and Nursing Professional Society Newsletters

- The Oncology Nursing Society Newsletter
- Local ONS chapter newsletters
- Oncology Nursing Society computer mail announcements
- State board of nursing newsletters
- State Cancer Pain Initiative mailings

4.4.5 Major Pharmacy Journals

- U.S. Pharmacist (circulation 100,000+)
- Drug Topics /Hospital Pharmacist's Report (circulation 100,000+)

Actiq Risk Management Program (RMP)
08/01/01

- Formulary (circulation 100,000+)
- Journal of the Association of Healthsystem Pharmacists (circulation 70,000+)
- Journal of the American Pharmaceutical Association (circulation 48,000+)
- Journal of Managed Care Pharmacy (circulation 40,000+)

4.4.6 Pharmacy Newsletters (Print and Electronic)

During the initial launch of *Actiq*, requests were made that the *Actiq* key safety messages and new product reviews were to be incorporated into the newsletters of various national, regional, state and local pharmacy organizations including:

- The Pharmacist's Letter (circulation - 100,000+)
- Chain drugstore newsletters and electronic updates
 - CVS 4,000 stores
 - RiteAid 3,000 stores
 - Walgreens 2,200 stores
- State board of pharmacy newsletters

4.5 Communication with DEA

Information on proper disposal of *Actiq* will be provided to the DEA for use by their field offices on an as requested basis. Background and training materials will be designed in concert with the Office of Diversion Control, Policy Liaison at DEA headquarters and will be distributed to all DEA field offices.

5.0 *Actiq* Launch Program

Actiq will target a relatively small group of clinicians. The emphasis of the promotion will be highly educational.

All educational and promotional launch materials will be submitted to and reviewed by FDA prior to use.

Actiq Risk Management Program (RMP)
08/01/01

5.1 Target Audience

The target physician audience for *Actiq* is a group of approximately 5,000 oncologists and pain specialists, their nurses and office staff. These physicians are already using CII opioids to treat cancer pain, are generally knowledgeable about breakthrough cancer pain, and should understand the appropriate use of *Actiq* for opioid tolerant cancer patients.

Since the majority of *Actiq* use is anticipated to be in the oncology outpatient setting, the pharmacist will play an important gate keeping role in the *Actiq* RMP by screening for proper patient selection (opioid tolerant cancer patients only) and by providing information on safe product use and handling to patients and caregivers.

Please note the entire universe of practicing oncologists, oncology nurses and pharmacists will receive the key messages through some of the broad-based communication vehicles described in the Professional Education section of this document.

5.2 The Oncology Sales Specialist (Cephalon, Inc. Sales Organization)

Full time Oncology Sales Specialists have been placed in the field to personally call on the target audience. The Oncology Sales Specialists are the primary day to day link to the physicians, nurses and pharmacists who will be using the product. The Oncology Sales Specialists play a key role in implementing the RMP.

Each Oncology Sales Specialist must be certified on *Actiq* via a rigorous product education and sales training program. This program begins with home-study modules, which explicitly spell out the three groups of key safety messages. The home study modules are followed by one week of in-house training at Cephalon, Inc. corporate headquarters and at least by one week of training in the field with a field trainer or seasoned field manager. This program is designed to clearly communicate the key safety messages and Cephalon, Inc. expectations regarding sales activity in the field. Importantly, Oncology Sales Specialists are tested prior to being certified to discuss *Actiq*.

In the approximately 3 months between product approval and product availability, the Oncology Specialists personally called on 1,000 of the 2,000 pharmacies dispensing the largest volume of CII products. In these calls they educated the pharmacist on all safety issues and enlist their assistance as gatekeepers. The second group of 1,000 high CII dispensing pharmacies were called on by Oncology Specialists in the first three months post product launch with the same messages.

Pharmacies not included in the initial target group were offered opportunities to obtain additional information through several elements of the *Actiq* Risk Management Program, including: Dear Pharmacist letter, pharmacy direct mail services, pharmacy journal advertising, pharmacy newsletters, and pharmaceutical compendia. These programs provide access to the 1-800 number and website for additional information about *Actiq*. In addition, the group of pharmacies and health care practitioners serving rural areas will

Actiq Risk Management Program (RMP)
08/01/01

be the target of a post approval commitment to better understand and meet their unique needs through an educational outreach program.

Upon hiring, each Specialist will receive a letter outlining his responsibilities. This letter will stress the requirement to limit the promotion of *Actiq* to the approved indication, discourage off-label use, direct the specialist to promote only to the target audiences, describe the serious consequences of violating this policy, and reinforce the three key messages of the RMP. This letter will be slightly revised from the currently approved one to reflect Cephalon's practices. It will be reviewed by FDA for prior approval before issue. Moreover, the compensation program for Oncology Specialists will direct them to promote into only the target audience.

In their personal calls to physicians, nurses, and pharmacists, the Oncology Sales Specialist will discuss a variety of educational material which may include:

- Package insert and patient leaflet
- *Actiq* safety video
- *Actiq* CD-ROM programs for physicians, nurses, and pharmacists
- *Actiq* Internet site
- Central 1-800 poison control number
- The *Actiq* Welcome Kit

All materials will be submitted to and reviewed by FDA prior to use. Revisions to these materials to reflect the new packaging will also be submitted to FDA prior to use.

5.3 Detail Aids

Detail aids for *Actiq* will emphasize the three key safety messages. To ensure consistent attention to the key safety messages, all "leave behind" detail aids will also prominently display the detail flag. This flag as well as all other promotional materials will be submitted to and reviewed by FDA prior to use.

5.4 Direct Mail

All materials will be submitted to and reviewed by FDA prior to use.

5.4.1 *Actiq* Professional Information Kit

Upon product launch, the target physician group will receive an *Actiq* Information Kit including:

- *Actiq* Package Insert and *Actiq* Patient Leaflet

Actiq Risk Management Program (RMP)
08/01/01

- *Actiq* Safety video designed for patients which covers
 - child safety
 - patient selection (opioid tolerance)
 - titration
 - storage
 - disposal
 - emergency care
- Information on accessing the 1-800 number, the *Actiq* internet site and Physician CD-ROM program all of which are designed to provide additional information
- Information on how to obtain the *Actiq* Welcome Kit

5.4.2 The Dear Doctor Letter

Upon product approval, a mass mailing to registered physicians in the U.S. will be conducted. This letter will reinforce the three key messages (child safety, proper patient selection and prevention of diversion and abuse) and encourage the appropriate physicians to mail in an enclosed business reply card and/or to visit the *Actiq* internet site for more information. The letter must have FDA review and prior approval before issue.

5.4.3 The Dear Pharmacist Letter

Upon product approval, a mass mailing to registered pharmacists in the U.S. will be conducted. The letter must have FDA review and prior approval before issue. This letter will reinforce proper patient selection and child safety messages and encourage the pharmacists to mail in the enclosed business reply card and/or visit the *Actiq* internet site for more detailed information.

5.4.4 Pharmacy Direct Mail Services

Information to pharmacists using pharmacy direct mail services will prominently feature the three key safety messages. All content will be submitted to and reviewed by FDA (DDMAC) prior to use.

5.5 Multimedia Programs

All content will be submitted to and reviewed by FDA (DDMAC) prior to use.

Actiq Risk Management Program (RMP)
08/01/01

5.5.1 *Actiq* CD-ROM Program

A CD-ROM will be developed and made available to all *Actiq* target audiences. It will include discussions of child safety, proper patient selection, prevention of diversion and abuse, appropriate product usage, product handling, storage, and disposal. A detailed schematic of the separate CD-ROM programs for physicians, nurses, and pharmacists is presented in Attachment 7. This program will be available via mass direct mail, the Oncology Specialist and the *Actiq* internet site.

5.5.2 *Actiq* Internet Site

An *Actiq* internet site will be made available to all *Actiq* target audiences. This will include discussions of child safety, proper patient selection, prevention of diversion and abuse, appropriate product usage, product handling, storage, and disposal. Sections will be targeted at physicians, nurses, pharmacists, patients and caregivers.

5.5.3 Emergency 911

This number will be prominently featured in all patient educational materials. Patients and caregivers will be instructed to call this number if *Actiq* has been inappropriately consumed and the person (eg, a child) is not awake and alert or is breathing slowly.

5.5.4 Central 1-800 Poison Control Number

A single 1-800 telephone number will be established at the Rocky Mountain Poison Control Center to receive all US emergency calls for *Actiq*. Having a central number allows for a focused, well-trained staff to be able to deliver a consistent message to patients and caregivers. It also provides for a near real-time surveillance of all poison control calls and an opportunity for timely analysis of any trends. This number will be prominently featured in patient educational materials. Patients and caregivers will be instructed to call this number if *Actiq* has been inappropriately consumed, and the person (eg, a child) is awake and alert.

6.0 Patient and Caregiver Education

6.1 The *Actiq* Welcome Kit

Upon launch, the 5,000 target oncologists and pain specialists will receive a supply of the *Actiq* Welcome Kit. The *Actiq* Welcome Kit will include the following items:

- Child Safety Lock - a lock to secure almost any existing household cabinet or drawer for the storage of *Actiq* and other medications (Attachment 8).

Actiq Risk Management Program (RMP)
08/01/01

- Secure Personal Container - a lockable pouch with a waistband (a fanny pack) will be provided so the patient can safely and conveniently store a day or two supply of *Actiq*. This pouch can be secured directly to the patient or to patient's bed or chair (Attachment 9).
- Child-Resistant Temporary Storage Container - an opaque container featuring easy-entry, but child-resistant removal. A warning decal will be attached to the outside of each container. This bottle will fit into the secure personal container (fanny pack) and will be used to secure completely and/or partially used *Actiq* units (should they exist) until the patient or caregiver can properly dispose of them (Attachment 10). Temporary storage containers will be available at the point of dispensing whenever and wherever *Actiq* is dispensed.
- Patient Leaflet
- Home Warning Stickers and Magnet (detail in section 6.3)
- Children's Booklet (detail in section 6.4)
- Emergency treatment information
- A brightly colored flyer with a special alert to families with young children

All content will be submitted to and reviewed by FDA (DDMAC) prior to use.

Every *Actiq* patient will receive a free Welcome Kit from his or her physician or via a 1-800 number. The kit and ordering information for it are described in the Patient Leaflet. Target pharmacists will be given an *Actiq* Welcome Kit by an Oncology Sales Specialist and briefed on how patients can obtain them.

Several components of the Welcome Kit--the Patient Leaflet and the Child Safety booklet--will be available in Spanish, and will be distributed in those geographical areas with high Hispanic populations. These will be available on request through the 1-800 number.

6.2 Patient Oriented *Actiq* Safety Video

A detailed patient oriented safety video will be made available to practitioners and patients to communicate the following messages:

- Child safety messages
- Proper patient selection messages
- Product storage and handling in the home
- Product titration
- Product disposal
- Emergency instructions

Actiq Risk Management Program (RMP)
08/01/01

This video will be mailed to the offices of the target physicians and will also be available to physicians and patients through the Oncology Sales Specialist or 1-800 number. This video will be available in either English or Spanish.

All content will be submitted to and reviewed by FDA (DDMAC) prior to use.

6.3 Home Warning Sticker / Refrigerator Magnet

An *Actiq* specific home warning sticker and refrigerator magnet will be distributed to all *Actiq* patients through the *Actiq* Welcome Kit. This sticker/magnet is to be placed around the home in high visibility areas and on the telephone. They will provide warnings for child safety and proper patient selection and contain emergency instructions for calling 911 and the central 1-800 poison control number.

6.4 Children's Booklet

A child-friendly booklet designed by the National SAFEKIDS Campaign in collaboration with the chairperson of the public education committee of the American Association of Poison Control Centers, Gail Banach, M.S.Ed., to be read and to be understood by younger children will be distributed. This book has been developed at a 2nd to 4th grade reading level. Older children may read it on their own. The primary goal of this booklet is to educate children on safe handling of all medicines including *Actiq*. The booklet will use simplistic language, realistic graphics and will be interactive to maximize the child's learning. This booklet will be made available in English or Spanish in the *Actiq* Welcome Kit and in the offices of all target physicians and pharmacists.

All content will be submitted to and reviewed by FDA (DDMAC) prior to use.

7.0 Point of Dispensing Interventions

The following activities will be implemented at the *Actiq* points of dispensing. Product samples will not be made available.

7.1 Pharmacy Software Systems - Precaution Software

In order to prompt the pharmacist to inquire about the presence of children in the home and to verify opioid tolerance of the patient, vendors of major commercial pharmacy precaution software will be asked to place *Actiq* warnings in their systems being used in the U.S. and its territories. Participating software systems will cover approximately 90% of the data systems in the U.S. pharmacy market.

Examples of pharmacy warning screens and electronically produced patient information sheets are provided as Attachment 11.

Actiq Risk Management Program (RMP)
08/01/01

7.2 The *Actiq* Welcome Kit

This kit (previously described) will be personally presented to all targeted retail pharmacies by an Oncology Sales Specialist and will be made available to any pharmacist upon request. The pharmacist will be encouraged to explain to the patient how they can obtain a free *Actiq* Welcome Kit, if they do not already have one, either directly from their physician or via a 1-800 number. Directions to obtain the *Actiq* Welcome Kit are also provided in the Patient Leaflet.

In addition to being enclosed in each *Actiq* shelf carton, the Patient Leaflet will be distributed in quantity to all target pharmacists by the Cephalon, Inc. Oncology Sales Specialists and be made available to any pharmacist upon request. The package (eg, back panel of shelf carton) and the computer program screen will prompt the pharmacist to go over the *Actiq* Patient Leaflet with every new *Actiq* patient. The Patient Leaflet will also be provided in the *Actiq* Welcome Kit. Where possible (eg, the *Actiq* Internet site and CD-ROM), the *Actiq* Patient Leaflet will be made available electronically.

7.3 Temporary Storage Container

Temporary storage containers will be available at the point of dispensing whenever and wherever *Actiq* is dispensed.

8.0 Surveillance Goals And Activities

The goals of the *Actiq* Surveillance and Monitoring Program are to:

- determine the effectiveness of the *Actiq* Risk Management Program by monitoring the potential incidence and outcome of child accidental ingestion, potential product use among opioid non-tolerant populations, off-label use, and possible diversion and abuse
- trigger intervention when problems are discovered
- make modifications to the *Actiq* Risk Management Program to improve its effectiveness

The following pages summarize the various means by which *Actiq* use and safety data will be collated and analyzed. (In the event that any of these pharmacy organizations are unable to participate in this program, Cephalon, Inc. will commit to substituting another potential supplier to broaden our sample in a timely manner.)

8.1 Direct Patient Feedback

8.1.1 Chain Pharmacy Call Back System

Actiq Risk Management Program (RMP)
08/01/01

A call back system will be used to directly query *Actiq* patients. Under this program, patients who receive an *Actiq* prescription at a participating pharmacy will receive a follow-up phone call by a company pharmacist. During this call, the following information will be collected:

- Did the patient receive an *Actiq* Welcome Kit?
- Was the patient already on a strong opioid when they received the *Actiq* prescription?
- Was the patient or caregiver provided with the appropriate safety messages?
- What titration process has been used to this point?
- Are there any children in the home or with access to the home?
- How is the patient or caregiver storing and disposing of the product?
- Provide a child safety reminder.

The partners included in this system include RiteAid, Eckerd, Walgreens, and the Merck Medco system. This program will capture real time trends of inappropriate patient selection and child safety issues during the first year of sales, interviewing up to 1,000 patients per chain who fill *Actiq* prescriptions in each of these pharmacies.

This program will provide timely and specific data on actual patients in a significant, geographically distributed population sample as Walgreen, RiteAid and Eckerd stores are well-distributed throughout the country, and the Merck Medco mail order system is one of the largest in the U.S.

After the first year of the call back programs, the firm and the FDA may agree to discontinue the call back programs if it can be established that there is no longer a need.

8.2 Prescription Monitoring

8.2.1 IMS Xponent

Prescription data will be routinely monitored. The source of these data will be IMS Xponent, the largest sample available of *Actiq* prescriptions, segmented by physician specialty to determine prescribing trends. The IMS Xponent data sample represents prescriptions from over one million prescribers and over 35,000 retail pharmacies. Additionally, IMS Xponent captures 60 million mail order prescriptions per year. These data provide the prescriber's name, the physician specialty and zip code. These data will be analyzed by comparing the proportion of prescriptions being written by specialties such as hematologists/oncologists (appropriate patient selection) to usage by specialties such as surgeons (inappropriate patient selection). Cephalon, Inc. will receive IMS Xponent data 28 days after the end of each month. Therefore, data will be between 28-58 days current.

Actiq Risk Management Program (RMP)
08/01/01

8.2.2 IMS National Disease and Therapeutic Index

National prescription data segmented by physician specialty and by indication from IMS National Disease and Therapeutic Index (NDTI) will be analyzed. An example of an NDTI data sheet is attached (see Attachment 12). These data will be reported to the FDA on a quarterly basis as described in section 10.0.

8.2.3 Wholesaler Data

Per the FDA's previous agreement with Abbott Laboratories, *Actiq* will not be sold directly to retail pharmacy outlets, but will be sold only to DEA hospital and distribution registrants.

Cephalon, Inc. will receive information on retail pharmacy sales. This information will be shared with the Oncology Sales Specialist. The Oncology Sales Specialist will follow-up with these pharmacies to ensure that they are employing the "Point of Dispensing" interventions described previously.

Additionally, every two months a Cephalon, Inc. Trade Sales Specialist (wholesaler representative) will call on the high volume *Actiq* wholesalers. This person will request information on any additional pharmacies which need to be added to the list. Information from the Cephalon's meetings with wholesalers will be shared with the Oncology Sales Specialists for follow-up.

The sponsor will monitor for compliance to the RMP "Point of Dispensing" and report violations to the FDA quarterly along with any interventions made as a result.

8.3 Adverse Events

8.3.1 Cephalon, Inc. Standard Operating Procedure

Cephalon, Inc. has established specific procedures to respond to serious adverse events, which may be associated with *Actiq*.

A toll-free number will be staffed to receive adverse event reports. This system can be accessed 24 hours a day. Reports can be logged by clinicians, pharmacists, home caregivers, patients, sales representatives or others. All reports are logged into a computer database and investigated.

Any adverse event, as defined by current federal regulations, receives immediate investigation and follow-up by Cephalon, Inc.. The details of this procedure are summarized below.

Actiq Risk Management Program (RMP)
08/01/01

- a) The incident report is reviewed by an investigation team, and an investigation is initiated. This group remains responsible for oversight of the process and for briefing senior management as the investigation proceeds.
- b) The medical experience analyst assigned contacts the reporting entity as soon as possible. On-site investigation is implemented if deemed necessary.
- c) The medical investigation conclusions are discussed with Cephalon, Inc. to determine reportability.

8.3.2 Special Safety Commitments

Reports of all serious adverse events to the FDA will be made in accordance with current Federal Regulations. Based on an agreement between FDA and the sponsor, the following type of adverse experiences will also be reported to the FDA within 15 days:

- Any unintended pediatric exposure, whether or not serious and whether or not unexpected, will be processed and reported to the FDA as a "15 day Alert."
- Any serious adverse drug experience which is determined to occur in the context of diversion (ie, use by an individual other than for whom it was prescribed), whether or not the experience is unexpected, will be processed and reported to the FDA as a "15 day Alert."
- Any serious adverse drug experience which is determined to occur in the context of "off label use" (ie, that is used outside of the approved indication for *Actiq*) whether or not the experience is unexpected, will be processed and reported to the FDA as a "15 day Alert."

Definitions of "serious adverse drug experiences," "adverse drug experience," "unexpected adverse drug experiences," and "15-day Alert report," are stated in 21 CFR §314.80. These Special Safety commitments are in addition to the requirement for reporting of adverse experiences set down in 21 CFR §314.80. The above apply to reports from any source (eg, call-in, literature, poison control centers, etc).

8.3.3 Literature Monitoring

In addition to specific event reporting, Cephalon, Inc. maintains a system to monitor the literature for adverse events. This review is conducted monthly or at the time a specific literature citation is reported. Any significant findings will be included in the quarterly report (as per 21 CFR §314.80).

8.4 Poisoning and Overdose

Quarterly reports to FDA will include poison information, trends, and interventions derived from the following sources:

Actiq Risk Management Program (RMP)
08/01/01

8.4.1 Central 1-800 Poison Control Number

A single 1-800 telephone number will be established to receive emergency calls when *Actiq* has potentially been accidentally ingested and the patient or child is awake and alert. This system allows a near real time surveillance of all poison control calls. This number will be highly publicized in all patient education materials. Any significant findings will be included in the quarterly report (as per 21 CFR §314.80).

8.4.2 Toxic Exposure Surveillance System (TESS)

Toxic Exposure Surveillance System (TESS) reports all contacts with U.S. Poison Control Centers. This database will be monitored for *Actiq* exposures. These data are available once yearly and will be included in the analysis for FDA quarterly reports.

8.5 Abuse

Quarterly reports to FDA will include information, trends, and interventions derived from the following sources:

8.5.1 Routine Cephalon Interaction with DEA

Cephalon, Inc. will maintain communications with DEA and state drug control authorities.

8.5.2 Drug Abuse Warning Network (DAWN)

The Drug Abuse Warning Network (DAWN) is an ongoing national survey of non-federal, short-stay general hospitals that have a 24-hour emergency department (ED). A representative sample of these hospital EDs submit data, and national estimates of ED drug episodes or drug mentions are generated for all such hospitals. The DAWN system also collects data on drug-related deaths from a nonrandom sample of medical examiners located in 41 metropolitan areas. The Substance Abuse and Mental Health Services Administration (SAMHSA) division of the Department of Health and Human Services (DHHS) supports DAWN. This database will also be monitored to identify issues which have not surfaced through standard DEA interactions.

8.5.3 State Drug Control Authorities or State Boards of Pharmacy

Reports of diversion or abuse received from state drug control authorities will be investigated and submitted to the FDA as part of the quarterly report.

Actiq Risk Management Program (RMP)
08/01/01

8.6 Promotional Message Audit

Promotional message testing at six month intervals following product launch will be conducted to ensure that Oncology Sales Specialists are accurately delivering the key safety messages. This will be accomplished via telephone interviews or paper questionnaires with physicians that are prescribing *Actiq* and have been called on by the Oncology Sales Specialist. Where necessary, sales representatives will be re-trained and/or disciplined to ensure compliance with the targeted, focused launch/promotional plan.

9.0 Intervention

9.1 Off-Label Usage

9.1.1 Individual Prescribers

Whenever a problem of off-label usage becomes known and individual prescribers are identified, the following activities will take place:

- 1) A letter from Cephalon, Inc.'s Medical Department will be sent to all identified prescribers to emphasize the approved indication and appropriate patient selection. The letter must have FDA review and approval before it is issued.
- 2) Prescribing patterns will be monitored for the physicians in question. If a problem persists, an Oncology Sales Specialist will visit the physician/s to gather information and remind them of appropriate prescribing of *Actiq*.

9.1.2 Groups of Prescribers

If groups of physicians (such as a particular specialty) are identified as having prescribed *Actiq* inappropriately, and these prescriptions represent potential off-label usage greater than 15% of total quarterly *Actiq* prescriptions, Cephalon, Inc. will contact the appropriate professional society (ie, American College of Surgeons, American Society of Anesthesiologists). This letter will outline prescribing concerns and offer to implement an educational program in conjunction with the professional society in a national setting.

Prescribing patterns will be monitored for the physician groups in question and should the level continue to exceed 15% of total *Actiq* prescriptions for two additional quarters, an aggressive educational program will be initiated by mail clearly warning of the potential liabilities of prescribing *Actiq* to inappropriate patient populations.

Actiq Risk Management Program (RMP)
08/01/01

9.2 Accidental Ingestion

In the event of an unintended pediatric exposure, Cephalon, Inc. will initiate their standard operating procedure for adverse events detailed in section 8.3.1 of this RMP.

Actiq Risk Management Program (RMP)
08/01/01

10.0 FDA Reporting

Adverse drug experiences will be reported in accordance with 21 CFR §314.80, with the additional commitment that unintended pediatric exposures, and any serious adverse events and deaths associated with diversion or off-label use will be handled and processed as 15-day Alert reports (see Section 8.3.2, Special Safety Commitments). In addition to the reporting requirements of 21 CFR §314.80(c), these 15-day Alert reports will be sent to the Division of Prescription Drug Compliance and Surveillance (HFD-330) and the Division of Anesthetic, Critical Care, and Addiction Drug Products.

Cephalon, Inc. will provide a quarterly report to the FDA compiled from all data collected by the methods described under the *Actiq* Surveillance and Monitoring Program and Interventions (see Sections 8.0 and 9.0 of this document). This report will describe and provide data on any concerns for child safety, diversion, and off-label usage. Cephalon, Inc. will also describe any trends and associated interventions made as a result of concerns raised and will also describe any proposed changes to the *Actiq* Risk Management Plan. This report will be provided as part of the *Actiq* quarterly report to the NDA during the first year of marketing. The sponsor and FDA will then determine requirements for further reports and their frequency after the first year of marketing. These reports will be cumulative and contain current reports and identified safety trends.
