I felt like I was a Class President or something at the seminar...pretty popular guy as soon as someone would read my name badge and see I was from Watson.....

I don't think it will ever be under control, the bad boys are always a step ahead. This is why DEA likes to beat up on legitimate industry...it is all they can control!

Tom,

Thank you for your prompt reply....I hear you about the FBI's m.o. with reverses. The agents that were interested were from the San Diego field office and there was one presentation by a SD County prosecutor that keyed on the diversion wave in SD (especially Watson Hydro & Norco) really hard. Maybe I'm I heard it wrong at the DEA seminar but didn't the DEA people say they had the problem under control down there??

Hope things are well for you!

Pete

Hi Pete,

It is not uncommon to return from NADDI with a pocket full of placebo requests. We will be establishing a placebo program this year though, so you can forward the contact names to Lisa and they will be added to the list. Interesting that FBI inquired, they usually follow the money trail on high profile Rx cases through electronic channels, and tend not to get their hands dirty with reverse buys, etc.

Good morning!

Just got back from NADDI last night and wanted some clarification on how Watson (DEA Affairs) administers the placebo program for law enforcement. A few people at NADDI asked me about it as soon as they saw I was from Watson. The requestors were mostly FBI Agents who are working Rx cases but there were some local LE guys who wanted information as well.

Thanks for your help!

Pete
