

Walgreens Electronic Notes Field Definition

Field Name in Walgreens Databases	Source Definition ¹	SF Produced Field Name
adhoc_consult_rslv_cmnts	Consult resolution comments	prescription_adhoc_comment
adhoc_consult_rslv_rph_intl	Rph inits who resolved consultation activity	adhoc_consult_rslv_rph_intl
Annotated_by	Date and time annotation was made and Rph initials	annotated_by
Cen_Annotations	Annotation Text	annotations
cmnt	Prescriber comments	prescriber_location_comment
consult_reqst_cmnts	Consult request comments	prescription_request_comment
consult_reqst_rph_intl	Rph inits who requested consultation activity	consult_reqst_rph_intl
consult_rslv_cmnts	Consult resolution comments	prescription_resolve_comment
consult_rslv_rph_intl	Rph inits who resolved consultation activity	consult_rslv_rph_intl
dur_cmnt	Drug Use Review comment	dur_comment
dur_cmnt_cd	Drug Use Review comment code	dur_cmnt_cd
dur_desc	Drug Use Review description	dur_desc
dur_severe_cd	Drug Use Review severity code	dur_severe_cd
dur_src_cd	Where DUR conflict originated from. (C = Central, D =Direct Link)	dur_src_cd
pat_allergy_hlth_inq_ind	A Y indicates that the patient has been asked for any existing allergy and health codes. An A indicates that the patient has been asked about existing allergies. An H indicates that the patient has been asked about existing health conditions. An N indicates that the patient has been asked about neither.	pat_allergy_hlth_inq_ind
pat_allergy_hlth_type_cd	Indicates if a patient has allergies, drug allergies, or a health condition. (1- drug allergy, 2- allergy, 3- drug allergy and allergy, 4- health condition, 5- health condition and drug allergy, 6- health condition and allergy, 7- allergy , drug allergy and health condition. Max value of 7)	pat_allergy_hlth_type_cd

Data source: Walgreens Production WAGSFDATA00004 - WAGSFDATA00020.

In the "Appended Prescriptions" column, I indicate for how many of the Selected Sample Prescriptions a particular data field was populated, and thus for which data was appended to that particular prescription.

In the % column, I indicate the percentage of the Selected Sample Prescriptions for which there was data in that data field.
