**Subject:** Tesla go private

Assuming this transaction were to move forward, who is willing to go private? I know some separate accounts would be disallowed given charter and I have Bonnie working up those numbers now. Company is reaching out to their large holders now and good chance I get a call from Elon directly later in the week. I would not worry about price right now but this is more or less a willingness or ability to carry ownership into a private vehicle at this point.

Joe
